### LENS MARKING

Optical class symbols:

1. Continuous work

Mechanical strength symbols:

B. Medium energy impact, resists a 6 mm, 0.86 g ball at 120 m/s

T. The letter T, immediately after the mechanical strength symbol, authorises use for high speed particles at extreme temperatures.

Others symbols:

K. Resistance to surface damage by fine particles (optional)

N. Resistance to fogging (optional)

€€ European standard ☞ Manufacturer name

### TECHNOLOGY

#### B ESP

ESP. Extra sensory Perception, an innovative coating to reduce dazzle and the harmful affects of blue light. B-ESP filters 70% of blue light, 64% of visible light and 99.99% of UVA/UVB.

#### B CONTRAST

A revolutionary coated, gradient lens offering better long term eye comfort. B-Contrast is particularly suited to wearers of safety glasses with clear lenses.

#### B HD

A revolutionary coating for exceptional clarity and light transmission. It can be used for every type of job except those requiring solar protection in industrial fields. Unlike any other lens, wearers forget they are protected by the HD coating. Its visible light transmission rate is 96% compared with 90% for conventional clear lenses. Featuring a hydrophobic coating as standard, B-HD is a real polymer barrier and resists water and dirty marks.

#### PLATINUM

This permanent coating on both sides of the lens gives them a high resistance to scratching, to the most aggressive chemicals and delays the onset of fogging. In all circumstances and at all times the PLATINUM® lens innovation guarantees your eyes improved protection.

#### B CSP

This innovating coating is an effective solution for all activities that alternate exposure to bright light and low light, while also being suitable for extreme hot and cold temperature environments. CSP is also combined with the exclusive PLATINUM coating that sustainably combats fogging.

SAFETY

### FRAME MARKING

EN 166: guaranteed minimum resistance of the protective eyewear against everyday risks including dropping the protective eyewear onto the ground, ageing by light exposure, exposure to heat or corrosion etc.

F. Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s  
Maximum protection for glasses.

B. Medium energy impact, resists a 6 mm, 0.86 g ball at 120 m/s

T. The letter T, immediately after the mechanical strength symbol, authorises use for high speed particles at extreme temperatures.

€€ European standard ☞ Manufacturer name

Bollé Safety product approval certificates to CE standards will be sent on request.

### CLEANING AND STORAGE

CLEANING: The lenses should be cleaned regularly. Bollé Safety recommends only using the B-clean lens cleaning system.

MAINTENANCE: Pitted, scratched or damaged lenses must be replaced by replacing the complete product. If the frame is damaged also replace the complete product. After each use it is recommended to keep the spectacles or goggles in a microfibre pouch or rigid case.

STORAGE: All products must be stored in a dry and clean environment.
