## Personal Cooling Products

# SAFETY HELMET INSERT

### Features:

- Fast drying microfibers and natural minerals in high-performance fabric technology accelerate the cooling process
- Bact-Out® antimicrobial technology
- Flat seams for comfortable feel against your skin
- Velcro® straps attach to hard hat
- One size fits most

■ COOLING ZONE

### How ColdRush® Works:

With this cooling technology, high-performance fabric is moisture activated so that as water evaporates, fast drying microfibers and natural minerals accelerate the cooling process. When the sun's rays reflect off the minerals, thermal energy is thrown away from the body. Workers are cooler faster – and for longer. Odor and fiber deterioration won't be an issue with Bact-Out®, a proprietary antimicrobial technology that provides resistance and control against 99.9% of bacteria – even after 50 washes! ColdRush products also offer 30+ UPF UV protection to help workers stay safe in the sun.

### How to Use:

- Soak in water for 30 seconds or until saturated, ring out excess water, and place directly on skin
- When the cool effect fades, re-wet and reuse
- Cooling lasts up to four hours
- Store dry
- Machine wash, air dry, do not bleach

Apply water to high-performance material

Material absorbs and retains moisture

Fast drying microfiber filaments and natural minerals accelerate the cooling process while deflecting harmful sun rays
