### USER INFORMATION

**CE** REFER TO THE PRODUCT LABEL/MARKINGS FOR DETAILED INFORMATION ON THE CORRESPONDING STANDARDS. ONLY STANDARDS AND ICONS THAT APPEAR ON BOTH THE PRODUCT AND THE USER INFORMATION BELOW ARE APPLICABLE. ALL THESE PRODUCTS COMPLY WITH THE REQUIREMENTS OF REGULATION (EU 2016/425).

#### CAREFULLY READ THESE INSTRUCTIONS BEFORE USING THIS PRODUCT

This product is designed to minimise the risk and provide protection for working in a kneeling position and immediate injuries from hard surfaces and small stones and similar objects on the surfaces. However, always remember that no item of PPE can provide full protection and care must always be taken while carrying out the risk-relation activity.

#### HOW TO SELECT THE PERFORMANCE LEVELS OF PROTECTION

**Level 0:** Knee protectors suitable for use on flat or non-flat floor surfaces and providing no protection against penetration

**Level 1:** Knee protectors suitable for use on flat or non-flat floor surfaces and providing protection against penetration at a force of at least (100 + 5) N

**Level 2:** Knee protectors suitable for use on flat or non-flat floor surfaces and providing protection against penetration at a force of at least (250 + 10) N

#### PERFORMANCE AND LIMITATIONS OF USE

This product has been tested in accordance with BS EN 14404:2004+A1:2010 and have achieved performance listed in table.

These kneepads are designed to give limited protection of the wearer's knees when working in the kneeling position. The worker must however be aware of the danger of chronic damages to the knees and must regularly leave the kneeling position to slow down the effects.

#### FITTING AND SIZING

This product is intended to be placed on your knee and strapped on by the bottom and top straps in a comfortable and stable position, ensure that the straps does not pass within the centre of the back of the knee, while not constraining blood flow. Products which are either too loose or too tight will restrict movement and will not provide the optimum level of protection. Always test the positioning of the pads before commencing any work. This protector is available in one size fits all and has adjustable straps. The sizing is based on a waist size of <100 cm. Ensure the soft side is facing your knee and that the straps wrap around the back of your leg with the hook and loop tape on the straps aligned to hold the straps in the correct position.

#### USAGE

Any contamination, alteration to the protector, or misuse will dangerously reduce the performance of the protector. This product is not water resistant. The kneepads have a service life of a minimum of 2 years although this may vary. The products should be inspected prior to every use.

#### COMPATIBILITY

To optimise protection, in some instances it may be necessary to use these products with suitable boots/gloves/helmet/ear defenders. In this case, before carrying out the risk-related activity, consult your supplier to ensure that all your protective products are compatible and suitable for your application.

#### STORAGE AND TRANSPORT

When not in use, store the product in a well-ventilated area away from extremes of temperature. Changes in environmental conditions such as temperature may reduce the performance of the protector. Never place heavy items on top of it. If possible, avoid excessive folding and preferably store it hanging vertically. If the product is wet, allow it to dry fully before placing it into storage.

#### REPAIR

If the product becomes damaged, it will NOT provide the optimum level of protection, and therefore should be immediately replaced. Never use the damaged product. If the knee pads show signs of severe wear such as broken shells or ripped pads the knee pads should be replace.

**MARKING** Refer to the Product or Product label.

#### WASH CARE INSTRUCTIONS

#### CLEANING

This product should be wiped clean – do not dry near a heat source.
